RE: Interim Measures Update/Completeness Determination  
Solvent Release Response and Remedial Action  
Egyptian Lacquer Manufacturing Company, Franklin, Tennessee

Dear Dwight:

I have reviewed your letter of October 30, 2009. The Division concurs with your completeness determinations and also concurs that ELMCO remains in compliance with the Consent Order. My delay in responding to your letter was attributable in part to additional indoor air monitoring that was performed on January 19, 2010 in certain homes on Daniels Drive. The indoor air monitoring exceeded the actions required as part of the interim measures, but was conducted to validate the results of the soil gas investigation. The additional testing is now complete and after review of the analytical results by TDEC and TDH, it is agreed that that ELMCO has complied with the requirements to assess impacts from soil vapor.

I am also granting your separate January 18, 2010 request to amend the groundwater monitoring schedule on some of the monitoring wells at the site as follows:

Monitoring wells 4,5 & 6 shall continue to be sampled quarterly. All other groundwater monitoring wells at the site shall be sampled semi-annually.

Now that these items have been completed, I would like to schedule a meeting with you and other ELMCO representatives to determine the additional steps that may be necessary before ELMCO will be able to propose the final remedy.

If you have any questions, please contact me at 615-532-0853.

Sincerely,

*Ashley A. Holt by RDF*
